

Dothan Specialty Clinic has improved our Patient Portal

Dear DSC Patient,

As part of our ongoing commitment to your health, DSC has created a NEW and IMPROVED patient portal. Having new ways to manage your health can help you achieve your goals, and we think MyHealthRecord.com will meet many of your needs, no matter when or where they arise.

New features are:

- View scheduled appointments and appointment request history
- Send secure messages to ask non-urgent questions about your care
- Request prescription refills and review current prescriptions
- Send your health records to other providers electronically

Our hope is that this convenient way to manage your care will save you time so you can get back to doing the things you love most, while still feeling confident about your health and treatment plans.

The Intuit Medfusion Patient Portal is no longer accessible. We are currently sending out Invitations to the new patient portal.

If you have any questions, please let us know.

Sincerely,

Dothan Specialty Clinic Staff
